This work is licensed under a Creative Commons Attribution-ShareAlike 4.0 International License.

<http://creativecommons.org/licenses/by-sa/4.0/>

You are free to:

- **Share** — copy and redistribute the material in any medium or format
- **Adapt** — remix, transform, and build upon the material for any purpose, even commercially.

The licensor cannot revoke these freedoms as long as you follow the license terms.

Under the following terms:

- **Attribution** — You must give appropriate credit, provide a link to the license, and indicate if changes were made. You may do so in any reasonable manner, but not in any way that suggests the licensor endorses you or your use.
- **ShareAlike** — If you remix, transform, or build upon the material, you must distribute your contributions under the same license as the original.
- **No additional restrictions** — You may not apply legal terms or technological measures that legally restrict others from doing anything the license permits.

Image Formats

- Bitmap
 - “Array of bytes”
 - File formats: JPEG, PNG, GIF, WebP
- Vector
 - “Lines and curves”
 - File format: SVG

JPEG

- Joint Photographic Experts Group (1992)
- 24-bit colors
- Compression (destructive)
- Ideal for photographs

PNG

- Portable Network Graphics (1996)
- 8-bit indexed colors; 24-bit colors
- Compression (lossless), transparency (alpha)
- Ideal for almost everything, except photographs

GIF

- Graphics Interchange Format (1987)
- 8-bit indexed colors
- Compression (lossless), transparency (binary), animation
- Ideal for flat color images, logos

WebP

- Developed by Google, open format (2010)
- Combine almost all characteristics of other formats (transparency, compression, animation, ...)

SVG

- Scalable Vector Graphics (2001)
- XML based
- Resolution independent
- Ideal for logos, technical drawings

Favicon

- A favicon is an image used to identify a web site in a title bar, tab bar or shortcut.
- The favicon.ico file should be located the web site root.
- Multiple formats can be used for different web browsers/platforms , with different sizes and quality levels.
- `<link rel="shortcut icon" href="favicon.ico" type="image/x-icon">`
(in the head of the HTML document)

Audio and Video Formats

- Audio and video files are containers, they contains one or multiple media in different formats.
- Medias are encoded with a codec.

Audio Format and Codecs

- WAV: uncompressed, .wav
- MP3: compressed, .mp3
- Ogg-Vorbis: compressed, .ogg
- MPEG-4 with AAC audio codec, compressed, .m4a

Video Formats and Codecs

- MPEG-4 + H.264 + AAC (.mp4)
- WebM + VP8 + Vorbis (.webm)
- WebM + VP9 + Opus (.webm)
- Ogg + Theora + Vorbis (.ogv)

Audio and Video HTML Elements

- `<audio src="file.mp3"></audio>`
- `<video src="file.mp4"></video>`
- Various attributes are available.

Audio Element Example

```
<audio autoplay loop controls>  
  <source src="file.mp3" type="audio/mpeg">  
  <source src="file.ogg" type="audio/ogg">  
  Sorry, your web browser doesn't support  
  audio playback.  
</audio>
```

Video Element Example

```
<video controls width="400" height="300"
poster="image.jpg">
  <source src="file.mp4" type="video/mp4">
  <source src="file.ogv" type="video/ogg">
  Sorry, your web browser doesn't support
  video playback.
</video>
```

Subtitles

- You can add subtitles by using the track element inside an audio or video element.
- The track element will reference a Web Video Text Tracks Format (WebVTT) file that contains the subtitles for each of the cues that are defined.
- Different WebVTT files can be used for different languages.

Intellectual Property / Licensing

- You must have a proper authorization for any audio, video or graphical asset used in your web site.
 - Using your own media files
 - Using public, royalty-free resources
 - Acquire a license from the original source
- This apply to all resources used on your website, regardless of the source (hosted on the same server or from a third party).
